Languages: Portuguese (native); Spanish (fluent); English (professional working proficiency); Italian (basic to intermediate).

Professional Summary

Senior Mobile Developer with 10+ years in software development and 7+ years building Flutter apps. Experience across fintech, agritech, insurance and government systems, plus four independently developed products. Work spans Android and iOS interfaces, Clean Architecture, offline synchronization, backend integration and CI/CD through Google Play and App Store releases.

Technical Skills

Mobile: Flutter, Dart, Android/iOS, Web/PWA, app flavors, deep links, localization, GPS, dart-define.

Architecture and state: Clean Architecture, BLoC/Cubit, Provider, dependency injection, design patterns, offline-first persistence and data synchronization.

Backend and cloud: Supabase Auth, Realtime and Edge Functions; PostgreSQL, SQL/RPC functions, schema migrations, Cloudflare Workers, REST APIs.

Security and realtime: Row-Level Security (RLS), JWT, authorization checks, rate limiting, concurrency control, idempotency, realtime/polling fallbacks.

Testing and observability: TDD, unit/widget/integration tests, pgTAP, Vitest, static analysis, Sentry, Firebase Crashlytics.

Data and services: Firebase, Remote Config, Messaging, Hive, Sembast, MySQL, MongoDB, DB2; Java and Spring.

Delivery and tools: Codemagic, Fastlane, GitHub Actions, Azure DevOps, mobile signing, obfuscation, App Store Connect, TestFlight, Google Play Console, Git/GitLab, Scrum.

AI integration and development: Gemini API; Claude Code, ChatGPT and Codex for implementation, debugging, refactoring and test generation.

Professional Experience

Cooper Tec | Senior Mobile Developer

Sep 2023 - Present

- Develop and maintain Android and iOS banking apps with Flutter across Cooper Pay's white-label ecosystem of 21 brands.
- Structure features with Clean Architecture, BLoC and dependency injection; use TDD and unit tests to support maintainable code.
- Integrate REST APIs, real-time features and GPS; implement local persistence and data synchronization.
- Work with app flavors, Google Play and App Store publishing, and Fastlane CI/CD pipelines in a Scrum team.

Agrosmart | Senior Mobile Developer

Jan 2022 - Jun 2023

- Developed Flutter features for agritech apps, including BoosterAGRO, using Clean Architecture, Cubit and dependency injection.
- Implemented offline data persistence and synchronization with Hive and Sembast, integrating REST APIs and backend services.
- Applied TDD and maintained delivery pipelines with Fastlane and GitHub Actions in a Scrum team.

Professional Experience Continued

Toro Investimentos | Mobile Developer

May 2021 - Dec 2021

- Developed Flutter features using Clean Architecture, dependency injection and unit tests; integrated REST APIs, local storage, Crashlytics and Remote Config, and contributed to Azure DevOps CI/CD.

IZA | Mobile Developer

Oct 2020 - Mar 2021

- Developed Flutter features for an insurance app, integrating Firebase services and NoSQL data storage.

Independent Products

Four Flutter products with Supabase backends and web/PWA support. Portfolio: lucksrei.com.

Match Queue: Team matchmaking for EA FC players. Implemented live queue updates, timed search sessions, automatic promotion and invite links, with PostgreSQL functions and row-level security (RLS).

La Pelve: Clinic management for pelvic physiotherapists. Built appointment scheduling, patient records, clinical histories, progress notes and financial tracking, with authentication and per-user data access.

FanHub / Goiás App: Football fan apps with match information, statistics, lineups, quizzes and rankings. Integrated data through Cloudflare Workers and Supabase, with club-specific app variants.

Aprovaaura: Exam preparation app with subject-based practice, mistake review, study streaks and mock exams. Integrated Gemini for essay feedback and built progress tracking with content in Portuguese, English and Spanish.

Earlier Experience

Freelance | Mobile Developer

Jan 2019 - Feb 2021

- Built Flutter apps from concept to store deployment, integrating REST APIs, Firebase and Google APIs with online/offline support.
- Projects: Emater for rural technicians and producers; AGR Fiscal for field inspections; Vai for ride-hailing and real-time GPS; GPOL for political activity management.

Memora Processos Inovadores | Mobile and Web Developer

Mar 2018 - May 2021

- Developed enterprise web systems and REST services with Java/JSP, ZK MVC, Spring, Maven and Tomcat; worked with DB2 and Oracle through development, testing and production maintenance.

SANEAGO | Software Developer Intern

2015 - 2017

- Developed internal systems and portals; contributed to eSocial and SAP integrations, requirements analysis and data modeling using OpenShift, Nexus and GitLab.

Education

Undergraduate Technology Degree in Systems Analysis and Development

Pontifical Catholic University of Goiás (PUC Goiás) | 2016 - 2019

Relevant Courses and Recognition

Udemy: Hybrid Mobile Application Development with Flutter (2018). Additional training: Test-Driven Development and Clean Architecture in Flutter.

Flutter Up! - #Hack2019 International Flutter Hackathon: Most-voted project at the Brasília hub. Built a Flutter app with a four-developer team in five hours.
